Agromet Research Centre, SKUAST-Jammu, Chatha-180009

email:jmu.agrimet@gmail.com

District : KATHUA

No. AUJ/Agromet/GKMS/24-25/139 - 42	Bulletin No:05/2024-25	Dated:16-04-2024
Phone:0191-2958213	Website: www.skuast.org	Fax: 0191-2263891

Weather summary of previous 5 days 11th to 15th April , 2024)

Range of Max. Temperature (⁰ C)	29.0-35.6
Range of Min. Temperature (⁰ C)	16.2 - 22.0
Range of Relative Humidity (%)	NA
Rainfall (mm)	1.2

Ensembled forecast for next 5 days (0830 hrs 17th to 21st April, 2024)

Date	Rainfall (mm)	Tmax (°C)	Tmin (°C)	RH Morning (%)	RH Evening (%)	Wind Speed (kmph)	Wind Direction (°)	Cloud Cover (Octa)
17-04-24	0	33	19	70	60	1	340	5
18-04-24	0	34	20	70	60	1	11	4
19-04-24	8	32	18	90	70	1	55	8
20-04-24	25	31	17	90	70	1	90	8
21-04-24	3	32	17	90	70	1	85	8

Chances of light to moderate rainfall from 18th to 21st April 2024. Sky may remain partially cloudy to mainly cloudy for next five days. The Maximum Temperature may range from 31°C to 34°C while the Minimum Temperature may range from 17°C to 20°C.Wind may blow from North Northerly Easterly to North Westerly direction with the speed of about 1 km/hr. The morning relative humidity may range from 70% to 90% and evening relative humidity may range from 60% to 70% during this period

Weather Forecast Based Agromet Advisories W.E.F 0830 hrs 17th to 21st April, 2024							
Сгор	Stage/Cultural	Weather based Agro- advisories					
	Operation						
Mustard	Threshing	Postpone threshing of mustard and gob sarsontill weather gets clear. Shift threshed crop immediately to safer places/ cover the crop					
		with Tarpaulin. Keep the bundles of harvested crop in stacks and					
		cover them with polythene sheets/ Tarpaulin. Do not let rain water to stagnate in fields.					
Wheat							
Early/	Physiological	Postpone harvesting and threshing till weather remains clear.					
Normal sown	maturity/Harvesting	Already harvested crop, keep the bundles in stacks and cover the					
		harvested crop with polythene sheets/Tarpaulin. Do not let rain water to stagnate in fields.					
Late sown	Hard dough	Remove off type plants.					
Pulses		Farmers may go for sowing of Mash (var.) Pant U-19, Uttara and					
Summer pulses	Sowing	Moong (var.) PDM-54, ML-131, ML 818, PS-16, PS-7, after receipt					
(moong/mash)		of rain, when soil remains in vattar condition of soil.					
Pea (late	pod maturity/	Postpone harvesting and threshing till weather gets clear					
sown)/lentil/Chick	harvesting/threshing	Cover the harvested crop with polythene sheets/ Tarpaulin. Do not					
pea		let rain water to stagnate in fields under late sown crop.					
Vegetables:	Emeridan e	D'alian of motions for its is not some and al					
Tomato	Fruiting	Picking of mature fruits is recommended

.....

те		
Leafy	Seed harvesting	In order to chance of rains after 3 days under such situation
vegetablesCoriande	C	harvesting of seed crop is recommended and shift the harvested crop
r, spinach, methi		in safer places/ cover the crop with Tarpaulin.
Cucurbits	Fruiting	Weeding and proper training of plants is recommended, when soil
(Cucumber /	Tutting	remains in vattar condition of soil
bottlegourd/		Place cushion of straw under fruits to avoid fruit root.
bittergourd/		Frace cushion of straw under fruits to avoid fruit root.
pumpkin)		
Fodder	~ .	Farmers may go for sowing of summer fodder
Summer fodder	Sowing	(maize+cowpea+charri) and bajra after receipt of rain during clear
		weather.
Floriculture		Do not allow rain water to stagnate in fields.
Chrysanthemum	Mother Stock	Grooming of mother plant is recommended. Postpone Irrigation.
Marigold	Seed maturation	Immediate harvesting of seed is recommended.
	Young/ Bearing	Remove water suckers. Keep basin free of weeds after receipt of
Mango/Citrus/	0 0	rains.
Guava		Postpone chemical plant protection measures till weather gets clear.
Oyster mushroom		Open bags after 15-20 days of spawn run. After opening the bag,
Oyster musmoom		maintain room temperature to 22-24°C and RH to 85-90%.
G • K		mannain toom temperature to 22-24 C and KH to 83-90%.
Sericulture		
	Tree plantation	Farmers may go for second disinfection of rearing appliances either
	Disinfection of	with 2% formalin or 5% bleaching powder solution. Keep the
	rearing halls/	appliances in sun after disinfection.
	appliances	
Apiculture		Reduce the entrance of boxes to protect bees from rain.
		Provide ample space for newly mated queen for egg laying.
		It is the right time to start bee keeping especially for the beginners.
		It is the right time to start bee keeping especially for the beginners. Artificial feeding of the bee colonies with sugar: water solution 1:1
Poultry		It is the right time to start bee keeping especially for the beginners. Artificial feeding of the bee colonies with sugar: water solution 1:1 ratio is recommended.
Poultry		It is the right time to start bee keeping especially for the beginners. Artificial feeding of the bee colonies with sugar: water solution 1:1 ratio is recommended. Provide adequate clean drinking water to birds.
Poultry		It is the right time to start bee keeping especially for the beginners. Artificial feeding of the bee colonies with sugar: water solution 1:1 ratio is recommended. Provide adequate clean drinking water to birds. Give vaccination against Gumbroo disease to 7 & 14 days chick.
Poultry		It is the right time to start bee keeping especially for the beginners. Artificial feeding of the bee colonies with sugar: water solution 1:1 ratio is recommended. Provide adequate clean drinking water to birds. Give vaccination against Gumbroo disease to 7 & 14 days chick. Avoid hurdling of chicks.
Poultry		It is the right time to start bee keeping especially for the beginners. Artificial feeding of the bee colonies with sugar: water solution 1:1 ratio is recommended. Provide adequate clean drinking water to birds. Give vaccination against Gumbroo disease to 7 & 14 days chick. Avoid hurdling of chicks. Maintain proper hygiene in poultry sheds.
Poultry		It is the right time to start bee keeping especially for the beginners. Artificial feeding of the bee colonies with sugar: water solution 1:1 ratio is recommended. Provide adequate clean drinking water to birds. Give vaccination against Gumbroo disease to 7 & 14 days chick. Avoid hurdling of chicks. Maintain proper hygiene in poultry sheds. Provide starter feed for first 14 days and provide finisher feed
		It is the right time to start bee keeping especially for the beginners. Artificial feeding of the bee colonies with sugar: water solution 1:1 ratio is recommended. Provide adequate clean drinking water to birds. Give vaccination against Gumbroo disease to 7 & 14 days chick. Avoid hurdling of chicks. Maintain proper hygiene in poultry sheds. Provide starter feed for first 14 days and provide finisher feed from 15 th day till sale.
Fisheries (Carp	Advanced	It is the right time to start bee keeping especially for the beginners. Artificial feeding of the bee colonies with sugar: water solution 1:1 ratio is recommended. Provide adequate clean drinking water to birds. Give vaccination against Gumbroo disease to 7 & 14 days chick. Avoid hurdling of chicks. Maintain proper hygiene in poultry sheds. Provide starter feed for first 14 days and provide finisher feed from 15 th day till sale. Harvesting/sale of marketable size fish is recommended.
Fisheries (Carp	Advanced fingerlings /yearlings	It is the right time to start bee keeping especially for the beginners. Artificial feeding of the bee colonies with sugar: water solution 1:1 ratio is recommended. Provide adequate clean drinking water to birds. Give vaccination against Gumbroo disease to 7 & 14 days chick. Avoid hurdling of chicks. Maintain proper hygiene in poultry sheds. Provide starter feed for first 14 days and provide finisher feed from 15 th day till sale.
Fisheries (Carp		It is the right time to start bee keeping especially for the beginners. Artificial feeding of the bee colonies with sugar: water solution 1:1 ratio is recommended. Provide adequate clean drinking water to birds. Give vaccination against Gumbroo disease to 7 & 14 days chick. Avoid hurdling of chicks. Maintain proper hygiene in poultry sheds. Provide starter feed for first 14 days and provide finisher feed from 15 th day till sale. Harvesting/sale of marketable size fish is recommended.
Fisheries (Carp		It is the right time to start bee keeping especially for the beginners. Artificial feeding of the bee colonies with sugar: water solution 1:1 ratio is recommended. Provide adequate clean drinking water to birds. Give vaccination against Gumbroo disease to 7 & 14 days chick. Avoid hurdling of chicks. Maintain proper hygiene in poultry sheds. Provide starter feed for first 14 days and provide finisher feed from 15 th day till sale. Harvesting/sale of marketable size fish is recommended. Dewatering of fish ponds followed by sun drying in order to kill/destroy all unwanted organisms.
Fisheries (Carp Farming) Live stock:		It is the right time to start bee keeping especially for the beginners. Artificial feeding of the bee colonies with sugar: water solution 1:1 ratio is recommended. Provide adequate clean drinking water to birds. Give vaccination against Gumbroo disease to 7 & 14 days chick. Avoid hurdling of chicks. Maintain proper hygiene in poultry sheds. Provide starter feed for first 14 days and provide finisher feed from 15 th day till sale. Harvesting/sale of marketable size fish is recommended. Dewatering of fish ponds followed by sun drying in order to kill/destroy all unwanted organisms. Dairy farmers from Jammu districts must vaccinate their livestock
Fisheries (Carp Farming)		It is the right time to start bee keeping especially for the beginners. Artificial feeding of the bee colonies with sugar: water solution 1:1 ratio is recommended.
